

REMARKS

Claims 16 and 20 have been cancelled. Claims 1, 4-7, 10-13, 15, 17, 18, and 21-24 have been amended to clarify the subject matter regarded as the invention. Claims 25-28 have been added. Claims 1-15, 17-19, and 21-28 remain pending.

The Examiner has objected to the drawings based on the objections noted by the Draftsperson. It is believed that the attached formal drawings overcome the objections to the drawings.

The Examiner has rejected claims 1-6, 10-13, 15-17, and 20-24 under 35 U.S.C. 103(a) as being unpatentable over Bernardo et al. in view of Kelly.

The rejection is respectfully traversed. With respect to claim 1, Bernardo describes a website generation tool that prompts a user to select features and options for the web site, and the tool generates the web site without the user writing any HTML or programming code. Kelly describes binding a user seeking unauthorized access to a target system to a false interface. By contrast, claim 1 recites “automatically selecting at least one data item from the collection.” Support for the amendment to claim 1 may be found, without limitation, in the above-captioned application at page 24, line 6 to page 28, line 10. Neither Bernardo nor Kelly teaches “automatically selecting” data items as recited in claim 1. As such, claim 1 is believed to be allowable.

To further clarify the subject matter regarded as the invention, claim 1 has also been amended to recite, “wherein the fictitious computer file system content is suitable for use in a deception environment to be presented to an intruder for the purpose of leading the intruder to believe that the intruder has successfully gained access to a system the intruder is targeting.”

Support for the amendment to claim 1 may be found, without limitation, in the above-captioned application at page 14, line 18 to page 16, line 17. Neither Bernardo nor Kelly describes generating such “fictitious computer file system content.” As such, claim 1 is believed to be allowable for this additional reason.

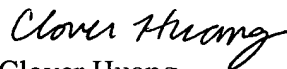

Claims 2-22 and 25-28 depend from claim 1 and are believed to be allowable for the same reasons described above. Support for new claim 25 may be found, without limitation, in the above-captioned application at page 23, lines 15-19.

In addition, with respect to claims 12-15, neither Bernardo nor Kelly describes intentionally introducing spelling or grammatical errors. With respect to claims 17 and 21, neither Bernardo nor Kelly describes relative probability of occurrence. As such, claims 12-15, 17, and 21 are believed to be allowable for the additional reasons stated.

Like claim 1, claims 23 and 24 recite “automatically selecting at least one data item from a collection of data items available to be inserted into the template.” As such, claims 23 and 24 are believed to be allowable.

Reconsideration of the application and allowance of all claims are respectfully requested based on the preceding remarks. If at any time the Examiner believes that an interview would be helpful, please contact the undersigned.

Respectfully submitted,

Clover Huang
